Harvesting Success: Celebrating Our Teams and Progress

Written by Jason Ohlheiser

As we approach the end of the year, we observe a decrease in daylight hours, a cooling of the weather, and a renewed focus on our goals. Throughout the year, our plants have been diligently working to produce high-quality products for our customers. This achievement would not be possible without the unwavering dedication and hard work of our teams, who effectively navigate various challenges and conditions.

The Firestone and Carbon Valley sites exemplify this commitment. The Carbon Valley (Brooks Farm) site is scheduled to be mined out within the next few months and the site will be transferred to the Town of Firestone

for water storage in 2025. This site has been instrumental in producing Class 6, Class 5, 1 1/2, and Structural backfill for numerous LGE customers. In the near future, the Carbon Valley plant and its team will join the Firestone site, where they will continue to produce a range of road base materials. We look forward to integrating this plant and its dedicated crew into the Firestone team.

Meanwhile, Firestone has had a productive year, focusing on completing the current mining cell and preparing the next section to ensure uninterrupted plant operations. Our teams have consistently worked to maintain the plant, enabling us to build our stockpiles of materials for our customers. We are enthusiastic about the forthcoming collaboration with Carbon Valley and the added strength it will bring to the Firestone team.

As the manager overseeing both sites, I take immense pride in being part of these teams and witnessing both the professional development of our employees and the growth of our company.

Pictured above is the team in Firestone, CO. Not pictured is the author, Jason Ohlheiser.

Pictured on the left is the three man operation at our Carbon Valley location. They will be joining Firestone in the upcoming months.
